Case Study

Data Migration

Overview

- Client is an emerging leader in the field of data-driven technology solutions.
- Is focused on creating a simple, yet comprehensive solutions for assessment creation, delivery, scoring and reporting.
- Has several districts with old legacy tests that need to be migrated to the client's proprietary assessment tool.

Client Ask

- Migrate questions and tests from PDFs to client tool/web platform.
- Tests covering grades K-12 for multiple languages and subjects.

Trivium Support

- Test migration across multiple grades.
- Assigning tags and standards.
- Creating different question types including MCQs, Inline choice, Technology-Enhanced (TEI) question items – Drag and Drop, Line Plot, Hot-Spot, Graphing, etc.

Project Highlights

- Worked with the client over the last 10 years on providing data entry services to migrate tests to the client's tool.
- Migrate on average 400-500 tests/month with an average of 25-50 items per test.
- Subjects including ELA, Math, Science, Social Sciences, and other languages.
